

SYSTEMS DEVELOPERS

Santa Fe, New Mexico

Prediction Company, a small firm utilizing the latest forecasting & automation technologies for prediction and computerized trading of financial instruments, is looking for software developers. We have a successful 12-year track record and the backing of UBS, a large international financial institution.

Prediction Company offices are located in Santa Fe, New Mexico, a city known for its culture, beauty, and outdoor lifestyle. Biking, hiking, camping, rock climbing, fossil hunting and skiing are all possible in the immediate area.

The successful candidate for these positions will have at least a BS degree in computer science or other technical discipline, broad experience in specifying, designing & implementing software systems; and significant experience with object-oriented language & systems. The ideal candidates will have experience and proven skill in one or more of the following: distributed, multi-process & multi-threaded systems, storage systems, database systems, (relational & object-oriented), data management & data mining. The development & deployment platform consists of SPARC Systems running Solaris. The primary development languages are C++ & Python

Highly competitive compensation package with medical benefit Premiums paid, 401(k), annual bonus, 30 days off first year, relocation.
