Implement `snake-skinny?`, which takes a snake and returns `true` if the snake weighs less than 10 pounds, `false` otherwise.
Design Recipe II

**Data**

- Understand the input data

**Contract, Purpose, and Header**

- Describe (but don’t write) the function

**Examples**

- Show what will happen when the function is done

**Template**

- Set up the body based on the input data (and only the input)

**Body**

- The most creative part

**Test**

- Run the examples

Implement `snake-skinny?`, which takes a snake and returns `true` if the snake weights less than 10 pounds, `false` otherwise.
Design Recipe II

Data

- Understand the input data

Contract, Purpose, and Header

- Describe (but don’t write) the function

Examples

- Show what will happen when the function is done

Template

- Set up the body based on the input data (and only the input)

Body

- The most creative part

Test

- Run the examples

Implement `snake-skinny?`, which takes a snake and returns `true` if the snake weights less than 10 pounds, `false` otherwise
Design Recipe II

Data

• Understand the input data

Contract, Purpose, and Header

• Describe (but don’t write) the function

Examples

• Show what will happen when the function is done

Template

• Set up the body based on the input data (and only the input)

Body

• The most creative

Test

• Run the examples

Implement `snake-skinny?`, which takes a snake and returns `true` if the snake weights less than 10 pounds, `false` otherwise
Design Recipe II

Data

• Understand the input data

Contract, Purpose, and Header

• Describe (but don’t write) the function

Examples

• Show what will happen when the function is done

Template

• Set up the body based on the input data (and only the input)

Body

• The most creative

Test

• Run the examples

Implement `snake-skinnyn`, which takes a snake and returns `true` if the snake weights less than 10 pounds, `false` otherwise
Design Recipe II

Data
- Understand the input data

Contract, Purpose, and Header
- Describe (but don’t write) the function

Examples
- Show what will happen when the function is done

Template
- Set up the body based on the input data (and only the input)

Body
- The most creative part

Test
- Run the examples

Implement snake-skinny?, which takes a snake and returns true if the snake weights less than 10 pounds, false otherwise
Design Recipe II

**Data**
- Understand the input data

**Contract, Purpose, and Header**
- Describe (but don’t write) the function

**Examples**
- Show what will happen when the function is done

**Template**
- Set up the body based on the input data (and only the input)

**Body**
- The most creative part

**Test**
- Run the examples

Implement `snake-skinny?`, which takes a snake and returns `true` if the snake weights less than 10 pounds, `false` otherwise
Implement `feed-snake`, which takes a snake and returns a snake with the same name and favorite food, but five pounds heavier.
Design Recipe II

Data

• Understand the input data

Contract, Purpose, and Header

• Describe (but don’t write) the function

Examples

• Show what will happen when the function is done

Template

• Set up the body based on the input data (and only the input)

Body

• The most creative step: implement the function body

Test

• Run the examples

Implement *feed-snake*, which takes a snake and returns a snake with the same name and favorite food, but five pounds heavier
Design Recipe II

**Data**
- Understand the input data

**Contract, Purpose, and Header**
- Describe (but don’t write) the function

**Examples**
- Show what will happen when the function is done

**Template**
- Set up the body based on the input data (and *only* the input)

**Body**
- The most creative

**Test**
- Run the examples

---

Implement *feed-snake*, which takes a snake and returns a snake with the same name and favorite food, but five pounds heavier
Design Recipe II

Data
• Understand the input data

Contract, Purpose, and Header
• Describe (but don’t write) the function

Examples
• Show what will happen when the function is done

Template
• Set up the body based on the input data (and only the input)

Body
• The most creative step: implement feed-snake

Test
• Run the examples

Implement feed-snake, which takes a snake and returns a snake with the same name and favorite food, but five pounds heavier
Design Recipe II

Data

• Understand the input data

Contract, Purpose, and Header

• Describe (but don’t write) the function

Examples

• Show what will happen when the function is done

Template

• Set up the body based on the input data (and only the input)

Body

• The most creative step: implement the function body

Test

• Run the examples

Implement feed--snake, which takes a snake and returns a snake with the same name and favorite food, but five pounds heavier
Design Recipe II

Data
• Understand the input data

Contract, Purpose, and Header
• Describe (but don’t write) the function

Examples
• Show what will happen when the function is done

Template
• Set up the body based on the input data (and only the input)

Body
• The most creative step: implement the function body

Test
• Run the examples

Implement `feed-snake`, which takes a snake and returns a snake with the same name and favorite food, but five pounds heavier
Design Recipe II

Data

• Understand the input data

Contract, Purpose, and Header

• Describe (but don’t write) the function

Examples

• Show what will happen when the function is done

Template

• Set up the body based on the input data (and only the input)

Body

• The most creative

Test

• Run the examples

Implement `feed-snake`, which takes a snake and returns a snake with the same name and favorite food, but five pounds heavier.
