Implement the function `long-walk?`, which determines whether a number of blocks walked is more than 8 blocks.
Design Recipe I

**Data**

- Understand the input data: `num`, `bool`, `string`, or `image`

**Contract, Purpose, and Header**

- Describe (but don’t write) the function

**Examples**

- Show what will happen when the function is done

**Body**

- The most creative step: implement the function body

**Test**

- Run the examples
Implement the function `long-walk?`, which determines whether a number of blocks walked is more than 8 blocks
Design Recipe 1

**Data**

- Understand the input data: `num`, `bool`, `string`, or `image`
