Implement the function `cancel`, which takes an image and adds a red X over it
Design Recipe I

Data

• Understand the input data: num, bool, string, or image

Contract, Purpose, and Header

• Describe (but don’t write) the function

Examples

• Show what will happen when the function is done

Body

• The most creative step: implement the function body

Test

• Run the examples
Implement the function `cancel`, which takes an image and adds a red X over it

Implement the function `cancel`, which takes an image and adds a red X over it
Design Recipe I

**Data**

- Understand the input data: num, bool, string, or image

**Contract, Purpose, and Header**

- Describe (but don’t write) the function

**Examples**

- Show what will happen when the function is done

**Body**

- The most creative step: implement the function body

**Test**

- Run the examples
Design Recipe I

Data

- Understand the input data: `num, bool, string, or image`

Contract, Purpose, and Header

- Describe (but don’t write) the function

Examples

- Show what will happen when the function is done

Body

- The most creative step: implement the function body

Test

- Run the examples
Design Recipe I

**Data**

- Understand the input data: `num`, `bool`, `string`, or `image`

**Contract, Purpose, and Header**

- Describe (but don’t write) the function

**Examples**

- Show what will happen when the function is done

**Body**

- The most creative step: implement the function body

**Test**

- Run the examples
